Professional Summary

Software Engineer with 8+ years of experience building enterprise software across fintech, space technology and web applications. Experienced in designing reliable, maintainable systems spanning desktop, backend integrations and modern web interfaces, with a pragmatic approach to AI-assisted software development.

Impact Highlights

- Delivered software across regulated fintech and mission-critical space-tech environments.
- Improved release confidence by expanding automated regression and UI test coverage.
- Applied AI-assisted development workflows to accelerate implementation cycles.

Experience

• 2021 – Present

Software Developer | *Profidata AG*

- Delivered and evolved core Xentis modules supporting portfolio operations, compliance workflows, and fund administration in regulated financial contexts.
- Expanded automated regression and UI coverage, increasing release confidence while reducing manual validation effort.

Java Spring Swing Eclipse RCP QF-Test JUnit CI/CD Podman Git Fintech

• 2017 – 2021

Software Engineer | *Deimos Engenharia*

- Delivered engineering contributions to ESA Earth Observation applications, including S2G, ESOV, and DFDL4S.
- Built and evolved Java tooling that improved telemetry visualization and technical data inspection workflows in mission-critical contexts.

Java Swing Eclipse RCP JUnit CI/CD Git C++ OpenLayers Leaflet ESA

• 2025 – Present

Freelance Web Developer | *Independent Projects*

- Delivered custom websites for small businesses from requirements gathering to launch.
- Built responsive interfaces that improved readability, maintainability, and overall delivery quality.

React Vite JavaScript HTML CSS Client Delivery

Selected Projects

Xentis Investment Management

CURRENT

Enterprise platform for portfolio management, compliance, and fund administration in regulated financial environments.

🔗 [View project](#)

ESOV NG Visualization

ESA

Visualization tooling for ESA satellite orbits and instrument swaths used in mission analysis workflows.

🔗 [View project](#)

DFDL4S Data Format

ESA

Binary data binding library enabling read and write operations for CCSDS space packets.

🔗 [View project](#)

Web Delivery Portfolio

WEB

Delivered multiple business websites with responsive UX, maintainable code structure, and clear conversion-oriented user journeys.

Education

Master in Computer Science

2015 – 2020

FCT-UNL

Focus areas: web development, data analysis, machine learning, and visualization.

Bachelor in Computer Science

2010 – 2015

FCT-UNL

Core training in software engineering, algorithms, and object-oriented programming.
