Professional Summary

Software Engineer with 8+ years of experience building enterprise software across fintech, space technology and web applications. Experienced in designing reliable, maintainable systems spanning desktop, backend integrations and modern web interfaces, with a pragmatic approach to AI-assisted software development.

Technical Skills

- Core Engineering:** Java, Swing, Eclipse RCP, Spring, C++, XML
Web Engineering: JavaScript, React, Vite, HTML, CSS
Testing and Quality: JUnit, QF-Test, test automation, regression testing
DevOps and Workflow: Git, CI/CD, Podman, Agile delivery
AI-assisted Engineering: GitHub Copilot, ChatGPT, Cursor, Claude Code

Professional Experience

Software Developer, Profidata AG 2021 – Present
Fintech product engineering

- Delivered and evolved core Xentis modules supporting portfolio operations, compliance workflows, and fund administration in regulated financial contexts.
- Expanded automated regression and UI coverage, increasing release confidence while reducing manual validation effort.

Software Engineer, Deimos Engenharia 2017 – 2021
ESA Earth Observation software

- Delivered engineering contributions to ESA Earth Observation applications including S2G, ESOV, and DFDL4S.
- Built and evolved Java desktop tooling that improved telemetry visualization and technical data inspection workflows.

Freelance Web Developer, Independent Projects 2025 – Present
Client web delivery

- Delivered custom websites for small businesses from requirements gathering to release.
- Built responsive interfaces that improved readability, maintainability, and overall delivery quality.

Selected Projects

- Xentis Investment Management (CURRENT)** – Enterprise platform for portfolio management, compliance, and fund administration.
- ESA Tooling (ESOV, DFDL4S, S2G)** – Java desktop and data tooling for mission analysis and telemetry workflows.
- Web Delivery Portfolio (WEB)** – Business websites with responsive UX and maintainable frontend structure.

Education

- Master in Computer Science, FCT-UNL** 2015 – 2020
Focus areas: web development, data analysis, machine learning, and visualization.
- Bachelor in Computer Science, FCT-UNL** 2010 – 2015
Core training in software engineering, algorithms, and object-oriented programming.
